# EASY TO USE

Gently clean the skin and let it dry.  
(Do not apply to an open wound)

Apply a thin layer of gel to the  
affected area and gently massage it  
into the scar.

For best results, apply twice a day for  
2-3 months or until the scar fully  
disappears

**For optimal healing and scar tissue  
reduction, use WoundVite to help improve  
your nutritional requirements required to  
support healing acceleration.**

# ScarMedx® FAQS

## **What makes Scar Medx so extraordinary?**

It is a medical grade silicone scar gel that is enriched with the skin repairing properties of Panthenol and Collaxyl (Hexapeptide-9), an innovative healing peptide. Using this scar gel silicone formula stimulates skin tissue repair and reduces the formation of deep scars.\*

### **When can I use Scar Medx?**

For best results, start using Scar Medx as soon as your wound has closed and continue using daily for at least 8 weeks on new scars and 3-6 months on existing scars. Make sure the scab has come off naturally and any stitches have been removed. On older scars you may start using Scar Medx immediately.\*

### **Why should I use Scar Medx® and WoundVite® together?**

Clinical studies show at least 40% of patients are malnourished. Having key nutrients in your body may reduce medical complications, lower your risk of infection and may help improve healing. WoundVite provides key nutrients to support healing and scar tissue reduction internally, while Scar Medx enriched Collaxyl (Hexapeptide-9) helps support the tissue healing process externally.\*

### **Are your products high quality?**

Yes, absolutely. We use bioavailable, organic and pharmaceutical-grade ingredients in our formula to optimize absorption. Our formulas are made in a state-of-the-art accredited facility.\*

### **What happens if my product arrives damaged?**

Simply contact Amazon or Zen Nutrients for a refund or we will ship out a new replacement product.\*
